CASE STUDY

BULLETIN PROCESSING AND DISTRIBUTION SYSTEM

Los Angeles County Sheriff's Department developed a standard mechanism to create comprehensive flyers and public information notice with R Systems' Bulletin Processing and Distribution solution.

www.rsystems.com

Problem Statement

The Los Angeles County Sheriff's Department was facing challenges in creating appropriate, comprehensive 'Wanted' persons flyer or Public Information Notice.

Business Need

- A well-defined, standard mechanism to create appropriate 'wanted' persons flyers
- A bulletin processing and distribution system for investigating officers and their supporting staff

Solution Approach

- Developed the Special Bulletin System (SBS), a bulletin processing and distribution system
- Assumed responsibilities for requirements analysis, database and application design, development of the application, application testing, system documentation and implementation
- The technology used are Microsoft ASP, HTML, DHTML, JavaScript, Visual Interdev and FrontPage on a Microsoft SQL Server

The Benefits

- Access to complete and accurate information of 'wanted' persons in minimal time
- Comprehensive, accurate flyers and Public Information Notices
